TO WHOM IT MAY CONCERN

This is to certify that **Mr. Deshitha Gallage** worked as a **Founding Software Engineer** at Nexster from **8th January 2024** to **28th June 2024**.

During his tenure, Mr. Gallage played a vital role in building the product as the initial software engineer in the team. His key responsibilities included:

- Major contributor in designing and developing the Nexster backend platform using GO.
- Major contributor in developing the Nexster web frontend using ReactJS.
- Collaborated on deploying and managing cloud infrastructure in Azure.
- Involved in designing and optimizing database schemas.
- Actively participated in code reviews and providing constructive feedback.
- Engaged in technical discussions, contributing to architectural decisions and strategic planning for product development.

Nexster is the Sri Lankan first social network. It is a one-stop place to find solutions for the needs of university students. Our mission is to provide software solutions for students to make their lives easy and productive.

Sincerely,

Namal Sanjaya

Founder
